Windows Server® 2008. More control, greater flexibility, increased protection.

Microsoft Windows Server 2008 lets you increase the flexibility of your server infrastructure to save time and reduce costs. Powerful new management tools and security enhancements give you more control so that you can spend more time adding value to your business. With Windows Server 2008, you can:

- Gain more control over your server and network infrastructure—and spend less time on everyday tasks.
- Create an agile, dynamic datacenter that helps you meet changing business needs.
- Provide a secure foundation on which to run and build your business.
- Deploy a next-generation server operating system that is designed for growth.
- Protect all systems against failure and intrusion, including servers, networks, data, and user accounts.

Realize the benefits of Windows Server 2008 with training

Prepare yourself for a seamless transition to Windows Server 2008. Whether you're just getting started or simply updating your skills, this first-look series of highly focused Microsoft Official Courseware gives you the tools you need. And this is just the beginning—exciting new courseware will be added for the official launch of Windows Server 2008.

Look for these official courses coming soon from Microsoft's Certified Partners for Learning Solutions—the best way to learn!

Microsoft Official Courseware for Windows Server 2008

First Look Series: Clinics (approximately 1.5 hours each)	First Look Series: Hands-on Labs (approximately 1.5 hours each)	Technology Skills: 3-Day Courses

Distinguish yourself. Earn your Microsoft Certification.

With Microsoft Official Courseware training, you can obtain highly marketable knowledge and skills that will help you advance in your profession. With Microsoft Certification, you have the credential to prove it. Microsoft Certification is the single most compelling way to demonstrate your expertise with Windows Server Longhorn to colleagues, your company, and potential employers.

If you currently have your Microsoft Certified Systems Administrator (MCSA) or Microsoft Certified Systems Engineer (MCSE), you can prepare for the official launch of Windows Server Longhorn by earning one of these Microsoft Certified Technology Specialist (MCTS) certifications.

To get started, determine the certification you are interested in obtaining, and then register for the course(s) that will help you prepare for your exam. Look for more great courses to become available after product launch. Windows Server 2008 will offer a variety of certifications after product launch to match your specific skill set.

Microsoft Certified Systems Administrator (MCSA)

Prepare: Courses 6415 and 6416 will help you prepare for Exam 70-648

Exam 70-648: Windows Server Longhorn, Technology Specialization (Update)
